Lean Ground Beef

Royal Angus Farms in Eagle Wisconsin sells 100% Black Angus Ground Beef. It comes in 1 lb, frozen, packages. The meat comes straight from our farm, just like the whole steer, sides, or quarters of beef. Our cattle are locally raised, pasture-fed, and hormone free. We have a great demand for Ground Beef, and since we want to be the farm that supplies our local families with good quality beef, this is another way our customers can enjoy excellent Ground Beef without paying a fortune.

It is available for pickup at our farm. We try to keep a constant supply on hand for your convenience.

If you have never had 100% Black Angus Ground Beef, this is a good opportunity to try the best Ground Beef you can possibly imagine. What makes our Ground Beef so special is that we have the entire Angus ground up; in other words, all the steaks and roasts are ground up, making this Ground Beef extremely lean and tasty. You can buy as little or as many pounds as you wish.

We suggest you try our Ground Beef in this way: Take the 1-lb package and divide it into 3 parts, making patties. Place the patties on your grill and don't over-cook; leave some "pink" inside, so that the meat does not dry out. Remember, it is very lean. In the meantime, on your kitchen stove sauté onions and mushrooms in a little butter. Then, take your patties off the grill, put your saute'd onions and mushrooms on top the hamburger patty, and eat it like a steak. You will experience the true taste of excellent Black Angus hamburger! Awesome!
